

## From the MD's Desk

I took over as the Managing Director of M.P. Transco on the afternoon of 16.12.2011 from my able predecessor Shri R.K.Verma. By this time, the Company has completed around 9½ years of its existence. With the able direction and support provided by the Energy Department, Govt. of Madhya Pradesh, M.P.Electricity Regulatory Commission and Board of Directors, the Company's journey over this period has been quite eventful. The Company has expanded and strengthened the State's Transmission System with an investment of over Rs.4000 crore during this period. Also a number of bench marks of excellent performance have been established. While the Company has succeeded in leaving its foot prints of its In-house Project Management Capability by ensuring completion of all system expansion/strengthening projects with the financial assistance of ADB, PFC etc. quite ahead of schedule and without any cost over run; it has been able to enhance the State's transmission system capacity from 3890 MW to over 9000 MW, reduce transmission losses from the level of 7.93% to 3.74% and consistently maintain the transmission system availability to the level of 99%. The Company has not only met all regulatory requirements specified by the Regulator but has also surpassed the targets fixed by the

Regulator with regard to twin parameters of operational performance viz. System Availability and Transmission Losses during this period. For its excellent performance on different fronts, the Company has been bestowed with seven coveted awards and also accolades from different quarters.

Thus, M.P.Transco is justifiably proud of having matched its steps with the development/growth requirements of the State in the course of past 9½ years of its existence.

The Secretary, Energy Department, GoMP cum ex-officio Chairman of the Company and Board of Directors have not been leaving any stone unturned to ensure that Company moves forward from strength to strength, meets all expectations of its stake holders and maintains its place as one of the best State owned Transmission Companies of the country. The time ahead requires us to excel in our miscellaneous pursuits and I am sure that the Company will be successful in taking on all the challenges on its road to progress. With this expectation, M.P.Transco wishes very happy and prosperous year 2012 to all.
